The following are the Committees for Sports June 3rd: Grounds — Todd, Langley and L. Cooley, Booths — C. W. Rideout, M. F. Suiter, L. Milligan L. Youell and Jas. Aitken, Dance — W. Seeger, W. Gallagher and A. V. Youell Gates — M. L. Chapman and D. E. Bell, Horse Shoe — W. Milligan Children's Sports — C. W. Rideout and R. F. Langley, Greasy Pole & Pillow fight — Todd and L. Cooley, Greasy Pig — W. Seeger, Other Field Sports — S. Meeres and L. Robinson.

Born — to Mr. and Mrs. Carl Otto Tuesday, May 18th, at Edmonton a daughter.

Mrs. Lionel Senecal who has been in the Cerebral Hospital receiving treatment, has recovered. She is spending a few days at the home of Mrs. M. F. Suiter, in town, before returning to her home, in the Rearville district.

Mrs. O. O'Malley spent the week end at Calgary.

Mrs. P. R. Dobson who has been visiting for some weeks at the home of her parents, left Thursday for her home in Calgary. She was accompanied by her sister, Miss M. Otto, who visited in the city for a few days.

Mr. J. M. Davis was Calgary week end visitor.

Mr. C. E. Neff, of Hanna, was a pleasant caller at the Advance office, Saturday.

Mrs. E. C. Pfeiffer left Tuesday for Calgary where she will spend a few days.

Mr. A. J. Girven, of Drumheller, visited with his aunt, Mrs. Isbister, on Sunday.

Chinook Boy Passed With High Marks

Vincent Rideout passed his second year engineering at the University of Alberta with first class standing, making over 85 per cent on eleven out of twelve subjects.

He has been granted the exchange scholarship from the University of Alberta to McGill University, where he will attend this fall. Vincent is spending his holidays at Jasper, where he has obtained employment.

KINGSTON, Ont., May 19 (C. P.) — Dr. R. C. Wallace, president of the University of Alberta, has been appointed principal of Queen's University to succeed Dr. W. Hamilton Fyfe, who accepted the principalship of Aberdeen University, it was announced today. Dr. Wallace will assume his duties Sept. 1.

ALBERTA GIRL WINS PRAISE OF TORONTO NEWSPAPER CRITICS

Margaret Waterhouse, formerly of Cerebral, who has a wide circle of friends in Southern Alberta, was warmly praised earlier this month by Augustus Bridle, writing in the Toronto Daily Star.

The critic wrote of Miss Waterhouse:

"Miss Margaret Waterhouse played a delightful piano recital at Conservatory, Hall last night. This young artist has considerably advanced on her poetic recital of last year. She began with two Bach arias arranged for piano by Harriet Cohen; both sacred melodies of unusual beauty which the player was careful to display with true lyric delicacy and a subtle blend of joy and devotion. In the Toccatina in G minor she broke into dance rhythm of particular exuberance. Here, skilfully playing one hand against the other, she was able to give the sensation of two figures dancing each its own measure in a sort of wordless dialogue. It was something more than mere chiselled technique of metrical rhythm and tone.

"Her Chopin group was a notable achievement. Five preludes of Op. 28 were played 'en suite' with particular regard for poetic sequence as a group. The one Etude was a brilliant interlude between the Preludes and the Fantasia in F minor, which was the most distinguished bit of tone-poetry on the program.

The Gluck Melodie was skilfully played as a prelude to two romantic things by Schumann, the Novelette in E major and the more popular 'Papillons.' The player expressed the subtle differences between the romantic idioms of Schumann and those of Chopin, who is never Tuetonic, as Schumann is seldom anything else.

The César Franck Symphonie Variations, with Agnes Logan Green at second piano, was an impressive finale."

The League and World Security

Have the League of Nations proved a failure? Have the efforts of millions of people to put into effect the principle of collective security for the nations of the earth been abortive? Should the League, in the light of recent events, be abandoned and allowed to die? In fact, is the League already gagged, helpless and practically defunct?

These are questions which are agitating the minds of peace-loving people in all the countries of the world to-day? Many who saw the birth of the League a few years ago as an insurance policy against future conflagrations between the nations are now shaking their heads sorrowfully and are on the verge of abandoning hope. They are fearful that the nations are to revert to former practices and policies of "dog eat dog and the devil take the hindmost."

It is pointed out by these pessimists that to date the League has two apparent failures to its credit, or should it be said, to its discredit? They refer to the inactivity of the League when Japan two or three years ago was allowed to launch unhindered an aggressive campaign to bring Chinese territory under control—a process which is still being carried on, and more recently the failure of the League's attempt to stem the victorious march of Mussolini's troops into Ethiopia, by the application of economic sanctions. It is true that Mussolini appears to have achieved his immediate objective and not only conquered Ethiopia, but has also annexed the country as an adjunct to the Italian crown, despite the efforts of those countries which remained in the League to prevent Italy from gathering the fruits of her lawless enterprise.

The fact, however, should not be overlooked that while Italy has so far succeeded in her ambitious program of conquest in Africa, the nations have not yet withdrawn sanctions against her and that by the continued application of this form of pressure it is still possible to force the victor to disgorge, if not all, at least a portion of the spoils of an illegal war.

In other words the flouted members of the League still have it within their power to demonstrate to Mussolini that international lawlessness does not pay. All that is needed, as pointed out recently by the Winnipeg Tribune is decisiveness. "The members of the League," said the Tribune, "can, by showing a little courage and determination at this juncture make it more of a living and vital force than it has ever been," but this newspaper adds, "unless they show some courage and determination in the present circumstances the League of Nations and collective security will vanish like the snows of yesterday."

The Tribune further points out that Mussolini after all has only won the first race and "is still racing against time in the application of the economic sanctions which are slowly but surely strangling Italy into submission. He cannot win that race unless the League members weaken and allow him to escape from the inexorable pressure."

There are very cogent reasons why wavering faith in the League should be restored. One of them is the urgent desire of the great masses of the people in the majority of the countries of the world for peace and security, so essential to economic recovery and progress is to be made. All that is necessary is for these people to strengthen the hands of their representatives by impressing upon them this viewpoint.

Another and very potent reason is the necessity for continuance and strengthening of the League and its powers if civilization is to be preserved. There is no blinking the fact that the majority of the European nations are arming to the teeth and that in some cases at least, conquest and subjugation are unrevealed motives. If that is true, a strong League is the only hope of security from further aggressions which may well involve the entire world.

Warnings of this very grave danger have recently been uttered by some of the outstanding statesmen of several countries and they are warnings that should not go unheeded.

That such a war is not only possible but "inevitable" is the opinion of General Ludendorff of Germany who makes this very clear in his new book whose very little is significant, "The Total War." According to a commentator on this book in Les Annales de Paris, Ludendorff only admits a war which engages the existence of the entire nation—men, women and children; in other words, a war conducted without mercy, "its only aim being the total annihilation of the enemy."

Apparently a strengthened and revived League is the only hope of security the nations can expect against such "a war of frightfulness."

The greatest of the fancy skaters will tell you that, contrary to popular belief, one doesn't need strong ankles to succeed at that sport.

Insects devour one-tenth of the world's crops.

Germany bought nearly two-thirds of the cotton produced in Brazil in the last year.

Industrial production in Austria is at the highest point since the world war.

AFTER EVERY
MEAL

After all, you bake for nourishment! Purity Flour—rich in gluten—has more "life" and nutrition. It also imparts that fine, tasty flavor which will make all your baking delightful.

PURITY FLOUR
Best for all your Baking

Demonstrates Plastic Surgery

Doctor Fashions New Ear From
Portion Of Rib

Taking part of a human rib to build a new and shapely ear by plastic surgery was demonstrated to the American Medical Association at Kansas City by Earl C. Padgett, M.D.

The piece of rib, taken from the cartilage at the base of a rib, forms the shell-shaped framework for the synthetic ear. The skin to cover this cartilage, and to form the soft fleshy "tire" constituting the ear's outer border, is taken from the neck.

Afterward the skin thus lost to the neck is replaced by skin taken from the thigh so that no neck scar is apparent.

The skin from the neck upon which depends the final sightliness of the new ear is moved by detouring it first to the temple by the plastic method known as the pedicle flap which resembled the handle of a suitcase. After this flap has been attached by one end to the temple area so that it gets its blood supply from that point by contact, it is ready to be dropped down over the new ear structure and be moulded into place.

WAKE UP YOUR
LIVER BILE—And You'll Jump Out of Bed in the
Morning Rarin' to Go

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, and the world looks pink.

A mere bowel movement doesn't always get it all out. You need something that works on the liver as well. It takes these good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle. They make the bile flow freely. They do the work of a natural liver on no calomel and no secret. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Destroys Bacteria

New Device That Will Be Of Assist-
ance In Operations

Invention of a new type of cool, germ-killing rays that destroys floating bacteria about the patient on an operating table was announced to the American Association of Thoracic Surgery by Deryl Hart, M.D., of Duke University Medical School.

The rays come from long, slender tubes framing the light above the operating table. Their rays were selected wavelengths of ultra-violet—which kill air-borne germs in 60 seconds, but do not burn human beings.

The tubes were designed by Dr. Robert F. James and Dr. Harvey Rentschler of the Westinghouse Lamp Company.

MOTHERS, DAUGHTERS

NO need for mothers or girls to suffer every month from periodic pains, headache or sickness.

In girlhood Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what one mother and daughter wrote to Dr. Pierce, dated 20 March 1910. St. Joseph, Mo., said: "My complexion had become muddy, swollen and I felt tired out day after day. I had frequent headaches, and would feel so miserable. I took Dr. Pierce's Favorite Prescription and it helped me in every way. My complexion cleared up, and the headaches disappeared." Buy now of your nearest druggist. New size, ladies size, liquid \$1.00 and \$1.25. Write to Dr. Pierce's Clinic, Buffalo, N. Y.

Use Of Codeine

Canada Has Highest Consumption
Of This Drug In The World,
Says Federal Member

Canada has the highest codeine consumption in the world, D. J. Hartigan (Lib., Cape Breton South) told the House of Commons. It could be purchased in capsule form at drug stores in quantities big enough to form a life habit.

Codeine should not be purchasable in Canada without prescriptions, Mr. Hartigan suggested. It should be controlled and imports stopped.

Must Discard Old Clocks

Los Angeles has ordered 200,000 sixty-cycle clocks to replace the present 50-cycle time keepers that will be outmoded as soon as the Boulder Dam electric system gets into operation. Otherwise the old clocks with the new 60-cycle impulse would make the citizens speed up 20 per cent, faster than previously.

Ho Was Starved

An unidentified man came into a Tampa, Florida, restaurant and announced he was hungry. He proved it by eating 17 steaks and 34 rolls and drinking 14 bottles of beer in two hours and a half.

Those who suffer from acid should avoid three fruits—cherries, cranberries and plums.

Have Seen Great Changes

Two Halifax Ladies Remember Days
Of Sailing Vessels

Two elderly Halifax women—their ages total 197 years—look forward with interest to the maiden voyage of the super-liner Queen Mary.

Both of them are something in the nature of ancient mariners. Mrs. Loring W. Bailey is the only person living who set foot on the little steamer Britannia when it sailed into Halifax harbor on its first voyage in 1840.

The other elderly seafarer, Mrs. Loring W. Bailey, crossed the Atlantic ocean from Liverpool to Halifax in the Cambria, a side-wheeler with sails 87 years ago. Both were six years old when they stood on the decks of their vessels.

Passage of years has not dimmed the memories of her first ocean crossing for Mrs. Bailey. Her father came to Canada to become chief superintendent of education in New Brunswick, she recalled.

Cheerful and still active in spite of her 103 years, Mrs. Loring remembered the arrival of the little Britannia vividly. She folded her arms and recalled the excitement of old Halifax in 1840.

"Word got around the Britannia was coming up the harbor," she related. "I was only a child but my mother gave my sister Lucy and me permission to go down to meet it. We lived not far from the wharf."

She told how a "gentleman in a tall silk hat," came down from the boat and took her sister and herself aboard. "My it was exciting," the old lady exclaimed.

Mrs. Loring has seen the ocean steamers change from wood to steel and expressed keen interest in the new liner Queen Mary. "It would be wonderful to see it," she said.

Will Appeal To Travellers

Air-Conditioning Of Trains Will
Mean Greater Comfort

One of the irritations of railroad travel was the dust and smoke that filled nostrils and eyes and smudged faces and clothes. Railway officials talked much but did little about remedying the condition. It is gratifying to note that they have now set out in earnest to cure the defect. It is announced that on all main lines of the C.N.R. the coaches are to be air-conditioned. Most U.S. lines have already installed this equipment.

The public will be as ready to praise the development as it was to criticize previous indifference. Air-conditioning will not only bring in pure air free from cinders and smoke, but will keep interior temperatures cool in summer and warm in winter.

It is by devising and installing comforts of this nature that the railways may hope to win back the good-will and patronage which has been lost. There are many obvious advantages to train travel and these can be capitalized if made sufficiently attractive.—Toronto Telegram.

Honored After Many Years

Body Of Leper Apostle Now Rests
In Belgium

Father Damien, Belgium's famous "leper apostle," who spent most of his life on the leper island of Molokai, Hawaiian Islands, was buried in a crypt at Louvain, Belgium, after lying in state at the Holy Heart chapel. Thousands filed past his coffin and prayed. A monument is being erected to his memory. The body of the priest was taken to Belgium for belated recognition of his work. He died in his voluntary exile among the lepers of Kalawao, February 15, 1889, and the body was exhumed for the trip back to his homeland.

Halstead street, in Chicago, containing representatives of practically every race in the world, is more than seven miles long.

SELECTED RECIPES

BROWN BREAD

- 1 cup wholewheat flour
- 2 cups wheat flour
- 1 teaspoon baking powder
- ¾ cup Edwardsburg "Crown Brand" Corn Syrup
- 2 cups sour milk
- 2 teaspoons salt
- 1 tablespoon Mazola
- Mix dry ingredients; add syrup, Mazola and sour milk. Beat well. Pour into oiled bread pan and let stand 1 hour. Bake in moderate oven at 350 degrees F. for 1-1½ hours. Recipe makes 1 large loaf.

Sir James Barrie

Author Of Peter Pan Celebrates His
76th Birthday

Sir James M. Barrie spent his 76th birthday quietly on May 10th in the famous flat where the immortal Peter Pan was born.

Callers who were not allowed to see him were assured by his Scottish housekeeper that the famous author was "Verra weel, thank ye kindly."

Sprigs of heather brought greetings to the "author who will never grow old" from his native Kirkcubright, while other friends remembered him with flowers and telegrams.

FLEMING'S FOLLY
—BY
LAWRENCE A. KEATING

SYNOPSIS

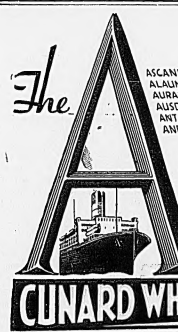

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and Jackpot Mel meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$800 they had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their money as soon as possible. The men reluctantly returned to work.

Fleming finds Roper and Jackpot Mel making trouble among his workmen, and orders them off his place at the point of his gun. Both Jackpot and Roper swear revenge. Mel telling Fleming to carry his gun with him, as Mel would shoot him the next time they met.

(Now Go On With The Story)

CHAPTER XIV.—Continued

The wiry little Irishman he addressed was pale with pain. But with the buoyancy of his race he grinned wryly. "Feel like one of them Egyptian mummies, Mister Fleming. Only I guess they ain't got busted legs like I have, eh?"

Link examined the man's injuries and found that he had an arm broken three inches below the elbow, feet and legs riddled with dirt and pebbles, and a bad bruise in his side. He was not dangerously injured, however, unless internally, which could not yet be determined.

When he made sure of arrangements going forward to take the pair by wagon to his own ranch, Link for the first time noticed that the remaining workers stood around in an attitude of surly indecision. "Well, boys?"

One, bolder than the rest, stepped forward. "We don't like the way things are going 'round here," he growled. "We want our pay. We're quit!"

For an instant Link did not know what reply to make. Several laborers supported this with similar statements, and the remainder of the group, a dozen strong, looked belligerent.

Fleming glanced toward the scene of the accident—it could possibly be an accident which he vaguely doubted. "I see," he said slowly. "You're all yellow. Scared to work here, just because a couple of men got hurt by something that couldn't be foreseen."

"Boys, I told McLendon to take every precaution for safety. Buster Townsend got the same instructions. Hey, Mac, isn't that so?" He saw the engineer coming toward him after personally seeing that Orles and Jimmie Dooley were started toward the Star Loop.

McLendon nodded. "I think I've done everything a man could," he said briefly, and hurried a withering look at the quitters.

"Well, they're yellow, Mac. They want their dolls. They're going home."

"Now, that ain't it, Fleming. We ain't scared. But—"

"But what, Ferguson? If you have anything to say, say it!"

The self-appointed leader shifted uneasily, hoping some of his fellows would speak up. But none did. "It's pay, mainly. And we been workin' long enough. We're quit!"

Fleming regarded him quizzically. "You want your wages to take home now, is that it? You're not out to earn all you can for that wife of yours, eh? Satisfied to earn a little while she takes in washing."

"There'll be more where that came from. I've kept my steers free just to take care of you homes, and I'm selling 'em tomorrow. That means cash at least before sunset. Ought to satisfy the crowd of you."

"But say," objected a grizzled individual who wore the habiliments of a miner, "we need twice as many guys workin' here!"

There was some truth in this. Fleming frowned and fingered his chin, glancing at McLendon. He could not think where it might be possible to get more men with the whole of Boone County hostile to his project. "Boys, we're nearly to the end of this job. I'll pay double for overtime, so there's a good chance for you to make some real money."

"And cash when?" persisted another individual. "Double time's no good until we get it!"

"There'll be more where that came from. I've kept my steers free just to take care of you homes, and I'm selling 'em tomorrow. That means cash at least before sunset. Ought to satisfy the crowd of you."

Do You Ever Wonder

Whether the "Pain" Remedy You Use is SAFE?

Ask Your Doctor and Find Out

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

THE person to ask whether the preparation you or your family are taking for the relief of headaches is SAFE to use regularly is your family doctor. Ask him particularly about "ASPIRIN."

He will tell you that before the discovery of "Aspirin" most "pain" remedies were advised against by physicians as bad for the stomach, and, often, for the heart. Which is food for thought if you seek quick relief.

Scientists rate "Aspirin" among the fastest methods yet discovered for the relief of headaches and the pains of rheumatism, neuritis and neuralgia. And the experience of millions of users has proved it safe for the average person to use regularly. In your own interest remember this.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

She's worth four of you, Ferguson, and I say it was unlucky she ever met you. You're lazy, no account, don't deserve an honest, pretty woman like you got. You never gave her a square deal yet, and if Mac hadn't stopped all liquor out here you'd be drunk same as you are at Rawhide more'n half the time!"

He spat disgustedly. "Your type is a quitter anyhow. You're no good to anybody, especially you wife and yourself. All right, you don't quit here. You're fired!"

The charges Link made were true, as every man listening knew full well. Yet he would not have uttered them had not his anger been aroused had he not needed a bold stroke. He knew at glance that Ferguson was the chief trouble-maker here, and perhaps was responsible for this sudden strike. Link advanced on the man. "Get out before I knock you down!"

The fellow retreated to safety. "I want my wages!" he whined.

Fleming plunged a hand into his trousers pocket and drew out several bills. "How much, Mac?"

"Twelve dollars 'an forty cents," supplied Ferguson.

"All right. Never mind lookin' it up. Here," and Link tossed over the change. "I'm glad to get rid of you so cheap. Now clear off this property before I knock you off!" he snapped.

But now he had received his money, Ferguson seemed reluctant to leave. He halted a safe distance and turned. "Say, Mr. Fleming—"

"Get out! And don't come back! Now, boys, what's the trouble? Worried I'm not going to pay up?"

Or are you a gang of good-for-nothings like Ferguson, so when you have a few dollars coming you want to scoot to town and guzzle it down in whisky?"

Stated this way, they were uncertain. "Wal," said a red-nosed man, staring down at his broken and dirt-rimmed finger nails, "I don't mind workin' another day or two for yuh, Link. That is, if I'm gonna get cash when it's over."

"Saw what I gave Ferguson?"

"Yeah."

"There'll be more where that came from. I've kept my steers free just to take care of you homes, and I'm selling 'em tomorrow. That means cash at least before sunset. Ought to satisfy the crowd of you."

"But say," objected a grizzled individual who wore the habiliments of a miner, "we need twice as many guys workin' here!"

There was some truth in this. Fleming frowned and fingered his chin, glancing at McLendon. He could not think where it might be possible to get more men with the whole of Boone County hostile to his project. "Boys, we're nearly to the end of this job. I'll pay double for overtime, so there's a good chance for you to make some real money."

"And cash when?" persisted another individual. "Double time's no good until we get it!"

I'll pay double for overtime, so there's a good chance for you to make some real money."

"And cash when?" persisted another individual. "Double time's no good until we get it!"

"You'll get it. Cash up to date tomorrow. I don't mean the next day nor next week. Tomorrow! That's definite I reckon? Now," he demanded, eyeing the crowd before him, "how about it? Who's quittin' and who's workin'?"

"I'm quittin'!"

"Me too! Two men stepped forward. 'I've had enough o' yore damned quarry, Fleming,' one declared with unexpected spirit. 'But mainly I don't expect yuh'll ever pay a cent. Once this dam's goin' yuh'll forget every man jack of us.'"

No hint of inner troublelessness showed as he looked at the remaining crowd of workers who with Buster, McLendon, and the man driving the injured pair to the Star Loop, comprised the staff. "Anybody else?"

For answer three shuffled away and picked up their tools. After some hesitation and considerable growling others followed suit. Nearly 24 men were again on the job.

Link took McLendon aside. "I sure appreciate you doin' your best, Mac. And the fact that Helen and I owe you two months' pay and never heard a word about it since the day you came."

The other stirred uneasily. I know you're a square shooter, Fleming," he paused. "Somebody around here spreads dissatisfaction among the men. They keep growling and complaining. This work is no harder than any other, but they keep worrying that you won't find the money to pay them."

Link looked troubled. "How about Buster Townsend?"

"Townsend? What do you mean? He tries to make them work."

"Ever see him wearing leather cuffs with rivets formed like a fleur-de-lis?"

McLendon blinked. "Yes," he said slowly, "I think I have. I'm sure of it. Why?"

"Thanks, Mac. I'll have a talk with Buster." Turning away, Link found his ranch foreman squinting at blueprints. No one was within earshot.

"Where's that pair of cuffs you used to wear?" he inquired casually, glancing at the brawny arms with sleeves rolled up.

"Tuh? Oh, them! Darned if I know. Yes, Townsend added quickly, "I guess one of 'em in the shack up above. I lost the other a couple days ago. Why?"

For answer his employer whipped out his forty-five. Its muzzle pressed hard against the foreman's stomach. "You had Helen Hamilton yesterday, just outside Rawhide!" he charged angrily. "Where's the money? Buster, I never thought you'd doublecross me!"

2 3/4 DOZEN CIGARETTES FROM EACH PACKAGE
Buckingham Fine Cut
MILD • COOL • SMOOTH

Astonishment flooded the other's leathery countenance and he glanced down at the threatening signum. But there was no trace of fear showing, only hurt plainly evident.

"You're wrong, Link," he declared. "I pulled no holdup yesterday or any other time. I've worked for yuh faithful as any man could. Yes, and last Fall I got shot for yuh, too."

There was a moment of tense silence. "Mac?" called Fleming over his shoulder. The engineer approached, his eyes wide in wonder at the gun covering Townsend. "Was Buster working here yesterday morning, or was he gone for awhile?"

The man hesitated while he searched the faces of the pair standing tense before him. "Why, sure he was here! Buster and I were wrangling over some blueprints. In fact, he proved that I'd miscalculated five-eighths of an inch. You see, on those supports for the—"

"Hm-m. All right." Abruptly he holstered his gun. He waited for the engineer to leave, a wondering expression on his sober face. Then Fleming extended his hand. "I'm sorry, Buster. Reckon I'm all tensed up about this thing. But how did your cuffs get on the holdup? Helen yanked one off, and I'm plumb sure it belonged to you!"

"Say! Ames Stephen came out here and gave me a regular third degree, but I didn't know what the heck it was about!" Comprehension dawned in Buster's honest eyes; then a wan grin covered his face. "Link, I wouldn't do a job like that. I missed the cuffs and thought they must be somewhere around or in the bunkhouse on the spread. Now ain't that funny, huh?" And the foreman chewed vigorously on his quid of tobacco.

Suffered years bad headaches and Constipation!

Quick relief from FRUIT-A-TIVES and troubles have not come back.

"For many years I suffered from severe headaches and constipation. Then I read of Fruit-a-tives and tried them. They brought quick relief. Now I am never bothered as I used to be, for I know Fruit-a-tives can always make me fit and healthy."—Mrs. J. Longway, Guelph. Fruit-a-tives are the discovery of a famous Canadian doctor. They contain concentrated extracts of nature's fruits and herbs. They tend to induce normal function of elimination organs and tend to tone up the entire system. A fair trial of Fruit-a-tives will convince you.

"MECCA" OINTMENT

Mr. CAFFEINE - NERVES . . . he's ushered out!

TO BE SURE, many people find that tea and coffee do not disagree with them. But others there are lots of them—cannot and should not drink them at all. You may be one of these—without realizing it. The caffeine found in both tea and coffee may be working night and day to rob you of sleep, upset your digestion, or undermine your nervous system.

If you suspect that tea and coffee do not agree with you . . . try Postum for 30 days. It is simply whole wheat and bran roasted and slightly sweetened. It is a delicious drink, and contains nothing that can possibly harm you.

FREE—To help you get started in your fight against caffeine-nerve, let us send you your first week's supply of POSTUM—Free! Write for it to Consumer Service Department 101, General Foods, Limited, Caneva, Ontario.

Planting Trees And Shrubs

The time to plant trees and shrubs is at hand, and consequently several considerations in regard to planting for ornamental effects would be in order.

First of all, the stock should be obtained from a reliable nurseryman located where climatic conditions are as nearly like the local conditions as possible. Best results are obtained from seeds or cuttings grown near home rather than from plants grown under different climatic conditions, as the plants will be likely to be harder and better adapted to the local conditions.

When handling shrubs while they are being transplanted it is essential to prevent the roots from drying out. A good practice is to carry the plants with their roots submerged in a pail of muddy water and not to remove them until they are ready for setting in the desired position. The holes must be sufficiently large to receive the full spread of the plant roots. The moist top soil is sifted around the roots after the plant has been set somewhat deeper than it stood in the nursery row and each layer firmly tramped with the heel. Watering may be done when the hole with the planted trees is approximately three-quarters filled. After the soil is thoroughly soaked the remaining soil may be filled in, (but not tamped) leaving a slight depression around the base of the plant. At this time the planter will find an advantage in outline back most of the branches to within 3 or 4 buds from the crown of the plant.

Shrubs may be set as far apart as they should be when they reach maturity, or they may be set more closely and removed from time to time as they crowd one another. When planted as they should be at maturity, it is desirable to use annual or perennial flowers between the shrubs for one or two years to have the clumps and borders filled. This often helps in bringing up an otherwise dull part of the landscape. With the other method of planting there is the difficulty that thinning will probably be delayed or possibly not done at all.

After the trees and shrubs are planted they will need cultivation for two or three years until well established when they can, for the most part, take care of themselves. It must be remembered, however, that the encroachment of grass and weeds must be prevented at all times. After a tree or shrub is well established, pruning is hardly necessary except for removing dead and broken wood or excess of suckers or new growth. The only time pruning is absolutely essential is at the time of planting, when it is well to be severe. Where mistakes are made in the original selection, as that plants of wrong size, habit, or texture are set at any point, the planter should not hesitate in removing them and replacing with appropriate plants.

HIGH RIVER.--The worst dust storm of the season raged all Wednesday, resulting in some blown out fields. Coming in the middle of seeding the storm was serious. Trave was perilous and motorist moved slowly along the high way with lights on. There was some interruption of the telephone system, with pole-broken and several lines affected. No accidents were reported.

PRAIRIE PROVINCES FIVE-YEAR CENSUS, JUNE 1st, 1936

THE CANADIAN GOVERNMENT INVITES THE WILLING CO-OPERATION OF EVERY CITIZEN

COMMENCING June 1st, the usual five-year census of the three Prairie Provinces will be undertaken. The object of this census is to gather statistics by means of which your Government can function more intelligently, more effectively and more economically in the interests of all citizens of the country.

No Government ever yet succeeded or gave its best without a thorough knowledge of its country and its people. That is why we ask your utmost co-operation in the census of the Prairie Provinces which commences on June 1st this year. When the Government Enumerator calls at your door, receive him courteously. Give him all the information for which he asks. Remember, he is the agent of good administration and is in your service. Help him to complete his work with all possible despatch. On the accuracy and completeness of your replies to his questions depends the best interest of yourself and your Government.

ALL INFORMATION IS HELD STRICTLY CONFIDENTIAL. You can place absolute trust in the official enumerator who calls on you. All information you provide will be held in the strictest confidence. It is compulsory by law to answer the questions put by the enumerator. But you are living up to the spirit of good citizenship as well as to the letter of the law by giving information readily, completely and sincerely.

Issued by Authority of
The Honourable W. D. EULER, M.P.
Minister

DEPARTMENT OF TRADE AND COMMERCE

Chinook Seeding Well Advanced

Seeding in the Chinook district is well advanced. The condition of the land is in better shape than it has been for many years, owing to having a good supply of moisture. The weather is quite unsettled Thursday with high wind with showers.

The Ladies' Card Club

The Ladies' Card Club met Tuesday evening at the home of Miss M. Milligan. Honors were shared by Mrs. Chapman and Mrs. Lee.

WHEAT GROWING IN BRAZIL

Another attempt is to be made to promote the growing of wheat in Brazil, where at present there is a negligible production of low quality. The Argentine correspondent of the Canadian Government reports. According to reports, the government of the state of Rio Grande do Sul is conducting an intensive campaign to encourage wheat growing, and is proposing to distribute gratuitously selected seed of

CHINESE WHEAT CROP LOW IN VOLUME

Chinese 1935 wheat crop is mostly much a failure, according to information from Nanking. It is estimated the total yield will be well under 500 million bushels which is possibly 60% of normal production and it is reported that the orient has been buying wheat of late weeks but export shipments are not in evidence save for an occasional cargo.

TELLS HOW TO BEAUTIFY HOME SURROUNDINGS

It is generally accepted that the home is the first and best place to practice charity so the home should be the first centre of beauty and no better start can be made in this direction than by beautifying the home grounds. For those who long when to make their home surroundings a joy to themselves and all who see them the booklet "Beautifying the Home Grounds of Canada" will prove a helpful and encouraging document. A limited number of this publication is available from the Canadian Horticultural Council, 114 Victoria Street, Ottawa, for the nominal price of 25 cents. It has chapters on landscape architecture, how to make the lawn, the flower garden, furniture, pools, rock gardens, the kind of shrubs, plants, trees, that can be grown in the different parts of the Dominion, with plans and illustrations. The time of the year is rapidly approaching when the nobles of pursuits—gardening, will be in full swing.

AUSTRALIA COMPLAINS ABOUT CANADIAN POLICY

Hon. T. H. Bath, prominent in the affairs of the West Australian Wheat Pool, criticizes the new selling policy of the Canadian Wheat Board, in a recent issue of the Producer, Australian farm paper. He says: "Canada and without firmness in their (Canadian Wheat Board) selling attitude holds the key to better wheat prices. Better prices will not be realized." Other Australian farm papers have taken the same attitude. It might be mentioned however, that Australia's contribution to the maintaining of better international wheat prices have been negligible. Even this year with small crop, large supplies are forced on the market by Australian shippers.

SANITATION IN POULTRY PRODUCTION

Today's baby chicks are next winter's egg producers and new is the time to be giving strict attention to sanitary measures which will help to ensure the development of a healthy vigorous flock of pullets to go into the laying house next October. As experienced poultrymen are only too well aware, poultry at any age are susceptible to a wide variety of diseases and once infected are extremely difficult to treat. This applies with special emphasis in young stock, since chicks are especially susceptible to infection during the first few months of their lives. Consequently prevention is much easier and much more economical than cure.

Where chicks are being raised in brooder houses, some attention should be given to the location of the house, and a word must be remembered in connection with raising the chicks in the brooder house at least 200 yards from the rest of the farm flock. In any case the chicks should, at all cost, be kept until they are at least 4 months of age, entirely separate from the rest of the flock, and on ground which has not been used by old hens for a full year or more. If suitable land is available it is a good plan to move the location of the brooder house occasionally during the summer to keep the young stock on dry land exposed to the action of the sun, as sunlight is one of the best and cheapest disinfectants, while damp shady spots are likely to be fertile breeding places for disease germs and parasites. If clean ground is not available much can be done through the use of small inexpensive sun porches (4 by 7 feet) made of woven wire with a half inch mesh bottom raised well above the surface of the ground.

However, the most ideal location may become polluted by ordinary sanitary measures are not practical. The brooder house should be thoroughly cleaned and disinfected before the chicks are introduced and, at the Lethbridge Station, a very satisfactory combination cleaning and disinfecting agent made by dissolving one can of lye in three gallons of boiling water is used. As this solution is very strong, the operator must be careful not to get it on his hands or face. A good disinfectant for washing houses is an old broom dipped in the above solution.

After the chicks are housed, steps are taken to keep the house and utensils clean. The litter is changed every few days during the first weeks and as often as is necessary to keep the house clean and dry thereafter. Care is taken to provide ample quantities of fresh water in clean, readily available vessels. Clean water is a cheap, but very essential feed and its importance is often overlooked, perhaps on the very account of its cheapness. A ration balanced according to the requirements of the chicks at various stages is made available in clean containers, in fifty liter or on contaminated ground. Ample supplies of green feeds are provided.

Good stock, good feed, good housing, and good management are the cornerstones of successful poultry keeping and the existing bright prospects of night prices for poultry products next fall and winter should offer every encouragement to the poultry keeper to begin now and continue to employ throughout the summer, the best practicable methods of feeding and management.
